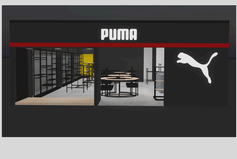
PUMA "FOREVER FASTER" CONCEPT STORE

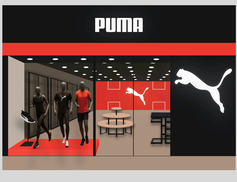
Retail Design & Strategic Store Planning | City Center Mall, Bokaro

Project Type: Retail Design & Visual Merchandising (Store Planning)
Software: AutoCAD / 3Ds Max / V-Ray / Adobe Photoshop / Adobe Illustrator



THE STRATEGIC BLUEPRINT

- **Brand Identity & Audience Targeting:** "Urban Aspirants" (Ages 15–40), this project bridges the gap between high-performance athletics and premium streetwear, located in Puma's "Forever Faster" DNA.
- **Mission & Objectives:** Establishing an exclusive, high-energy "Stadium" retail presence in the untapped Tier-2 market of Bokaro to replace traditional layouts through immersive design.
- **Site Context & Geometry:** Located within City Center Mall, Bokaro. The layout utilizes a floor-to-ceiling glass facade to eliminate visual barriers and maximize brand visibility from the mall corridor.
- **Conceptual Framework:** A "High-Contrast Industrial" aesthetic featuring Power Black and Ardent Red, utilizing "Action-Floor" mechanics to physically manifest the brand's essence of speed.
- **Operational Adaptability:** Engineered for seamless seasonal transitions; modular wall systems allow the floor plan to evolve with dynamic retail shifts.
- **Technical Execution:** Precision spatial mapping and future engineering, focusing on high-conversion "Hot Zones" and industrial-grade materiality.



SPATIAL DYNAMICS & ANALYSIS

- **Sector Trends:** Capitalizing on the global "Athleisure" shift. This design leverages raw industrial aesthetics to dominate the lifestyle sport segment in emerging urban markets.
- **Spatial Psychology:** Utilizing competitive luxury retail benchmark galleries, this concept utilizes aggressive visual cues and high-intensity lighting to create a superior emotional connection with the consumer.
- **Worldwide Distribution:** A high-efficiency modular layout (40%) serves as the rear "Power Wall" destination, Apparel (35%) occupies central storytelling zones, and Decompression (10%) ensures a seamless entry.
