PUMA "FOREVER FASTER" CONCEPT STORE

Retail Design & Strategic Store Planning | City Center Mall, Bokaro

Project Type: Retail Design & Visual Merchandising (Store Planning)
Software: AutoCAD | 3Ds Max | V-Ray | Adobe Photoshop | Adobe Illustrator

THE STRATEGIC BLUEPRINT

- **Brand Identity & Audience Targeting** "Urban Aspirants" (Age 15–40), this project bridges the gap between high-performance athletics and premium streetwear, rooted in Puma's "Forever Faster" DNA.
- **Mission & Objectives** Establishing an exclusive, high-energy "Stadium" retail presence in the untapped Tier-2 market of Bokaro to outpace traditional layouts through immersive design.
- **Site Context & Geometry** Located within City Center Mall, Bokaro. The layout utilizes a floor-to-ceiling glass facade to eliminate visual barriers and maximize brand visibility from the mall corridor.
- **Conceptual Framework** A "High-Contrast Industrial" aesthetic featuring Power Black and Action Red, utilizing "Action-Frost" mannequins to physically manifest the brand's essence of speed.
- **Operational Adaptability** Engineered for seamless seasonal transitions; modular wall systems allow the floor plan to evolve with quarterly collection shifts.
- **Technical Execution** Precision spatial mapping and fixture engineering, focusing on high-conversion "Hot Zones" and industrial-grade materiality.

SPATIAL DYNAMICS & ANALYSIS

- **Sector Trends:** Capitalizing on the global "Athleisure" shift. This design leverages raw industrial aesthetics to dominate the lifestyle-sport segment in emerging urban markets.
- **Competitive Positioning:** While competitors favor minimalist galleries, this concept utilizes aggressive visual cues and high-intensity lighting to create a superior emotional connection with the consumer.
- **Merchandise Distribution:** A high-efficiency layout; Footwear (40%) serves as the rear "Power Wall" destination, Apparel (35%) occupies central storytelling zones, and Decompression (10%) ensures a seamless entry.

RENDERED & TECHNICAL FLOOR PLAN WITH CUSTOMER FLOW

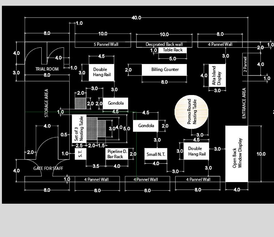
II.



TECHNICAL SPECIFICATIONS & VM

- **Materials & Finishes:** Powder-coated black metal pipes provide industrial durability, contrasted with laminated MDF wood tiles for a premium, tactile finish in footwear zones.
- **Illumination Strategy:** Integrated 3000K LED track "Hot Spots" target key products, supported by high-intensity overhead panels to maintain a vibrant, high-performance glow.
- **Fixture Engineering:** Implementation of modular "Pipeline" double-bar racks and nesting tables designed for maximum merchandising density and visual impact.
- **Atmospheric Experience:** The glass frontage invites traffic into a stadium-inspired environment where brand energy is amplified through 3D backlit signage and a high-contrast industrial palette.

SPACE ALLOCATION STRATEGY

Zone Category	Space %	Merchandising Purpose
Footwear (The Destination)	40%	Placed at the rear wall. As Puma's strongest category, it draws the customer through the entire store depth.
Apparel (High-Margin Storytelling)	35%	Centrally located using "Pipeline Double Bar Racks" to showcase seasonal "looks" and lifestyle collections.
Decompression Zone (Entrance)	10%	The first 5-8 feet are kept clear of heavy fixtures to allow customers to adjust to the store's lighting and music.
Accessories & Impulse	10%	Placed near the cash wrap and "Nesting Tables" for easy add-ons (socks, caps, backpacks).
Service (Trial Rooms/Billing)	5%	Discretely placed to ensure privacy while maintaining a view of the shop floor for security.

Execution Material Details & Cost Analysis

Item Category	Material Specification	Quantity / Unit	Rate (₹) per Unit	Total Cost (₹)
Flooring	Micro-Concrete (Pandoma)	111.5 sqm	₹2,700 / sqm	₹3,01,050
Wall Shell	Toughened Glass & Gypsum	45.0 sqm (Vertical)	₹10,000 / sqm	₹4,50,000
Fixtures	M5 Pipeline Racks & Gondolas	35.0 Units	₹21,500 / Unit	₹7,52,500
Hub Table	Cut HPL on Marine Ply	12.5 rsj m (Surface)	₹36,000 / sqm	₹4,50,000
Lighting	3000K COB LED Track System	60.0 R.Mtr (Track)	₹7,500 / R.Mtr	₹4,50,000
Branding	3D Acrylic & Perforated Metal	16.0 sqm (Signage)	₹20,000 / sqm	₹3,00,000
MEP	HVAC Ducting & Fire Safety	111.5 sqm	₹2,850 / sqm	₹2,95,475
GRAND TOTAL	(Excluding GST & Design Fees)		₹26,900 / sqm	₹30,00,000

Execution Strategy:

With A Total Estimated Budget Of ₹30 Lakhs, The Project Prioritizes Modular Joinery (40%) And High-CRI LED Lighting. This Ensures A Premium, High-Durability Retail Environment In Bokaro That Aligns With Puma's Global "Forever Faster" Industrial Aesthetic.
